

THOMAS & BETTS USA

Kopex cable protection systems founded in Slough in 1947, Kopex International has been at the leading edge of electrical conduit systems for over 50 years.

As a world leader, the company offers an outstanding range of metallic and non-metallic conduits as well as complementary fittings and other accessories. In this way, Kopex provides a one-stop-shop for all your electrical conduit needs - whatever your business.

In this way, Kopex provides a complementary metallic solution for our PMA nylon ranges for high demanding applications such as robotics, food processing, rail rolling stock, wind turbines and solar panels, off-road vehicles and many more.

The Kopex name stands for quality and reliability. Quality assurance in manufacture is backed up by accreditations from major organizations worldwide.
